

Introduction

FM Conway is a leading infrastructure services company delivering vital services in transportation, the built environment and open spaces, for communities and business.

We undertake our services through our self-delivery model and combine our in-house design function with front line operational excellence and central support teams.

We inspect, design, build, produce, enhance, and maintain essential infrastructure services for the community. We are committed to achieving the highest ethical standards and strive to ensure we demonstrate integrity and objectivity in our business activity.

We embrace the principles of Fairness, Inclusion and Respect in all that we do, and this is underpinned by our core values of Care, Integrity, Innovation and Excellence. We expect these principles and values to determine the behaviour of every person involved in our activities, with managers leading by example to ensure these are upheld at all times.

We do business with people like us and therefore encourage and expect similar standards and values from those in our supply chain; we have established overarching commitments that act as a framework for managing expectations. It is the company's responsibility to provide employees, members of our supply chain and our customers, with a safe and confidential mechanism to raise concerns and report any breaches of our standards, processes or protocols.

It is the responsibility of our valued stakeholders to report anything which may be of concern, suspected or validated, as it is through open communication and engagement with our stakeholders that we maintain the standards we have set for ourselves and expect of others; Listening to people, and responding honestly is how we can do business with integrity.
