

GREENPATCH

A Permanent pothole and patch
repair cold lay asphalt

GREENPATCH

GreenPatch Permanent Pothole and Patch Repair cold lay asphalt has been developed using a biodegradable softener that reduces the dependence for petroleum derived products.

GreenPatch is designed as a cold lay instant and permanent pothole repair asphalt with all year round performance.

Endurance and versatility

GreenPatch Manufactured with recycled asphalt (RAP) and no petroleum based 'cut-back' solvents *GreenPatch* is more environmentally friendly than alternative solutions.

The *GreenPatch* properties allow performance and workability at temperatures below freezing. The material will not evaporate in the summer or 'wax' in the winter which ensures a guaranteed shelf life of 12 months in bags or tubs and 6 months for bulk in open bays when stored correctly.

GreenPatch Permanent Pothole and Patch Repair is manufactured using high PSV aggregate for added skid resistance and can be trafficked instantly.

Features and Benefits

- Conforms with PD6691 Wheel Track Rate.
- Workable in temperatures below freezing.
- Low maintenance and rapid installation makes *GreenPatch* the ideal cost effective solution.

- No 'primer' or emulsions required.
- Suitable for Type 2, 3 and 4 low risk roads in accordance with SROH (Specification of Openings in Highways).
