

SUREFARM[®]

SureFarm[®] provides a resilient and durable surface course for agricultural environments needing a tough and sustainable solution

SureFarm[®] is a hot roll asphalt (HRA) designed using our in-house polymer modified bitumen (PMB) that can withstand the astringent acidic wastes and pollutants found in agricultural environments. It is available in a 10mm aggregate

AGRICULTURAL

SUREFARM®

WHY CHOOSE SUREFARM®

- ✓ Dense and resilient, with low voids and resistant to harsh chemicals, this product delivers an increased lifetime performance.
- ✓ A highly durable and low maintenance product.
- ✓ Together with well-designed drainage it improves the lifetime performance in areas that need to be resilient to corrosive acidic wastes and pollutants. Silage liquor is one of the strongest pollutants that occur on farms and is highly corrosive.
- ✓ The low void properties of SureFarm® means that the surface is dense, which vastly improves the ability to protect against the ingress of acidic wastes which permeate and corrode the surface.

APPLICATION BENEFITS

- SureFarm® provides quicker installation compared to traditional concrete, avoiding unnecessary delay due to concrete curing times, offering a cost-effective alternative.

DISCOVER THE FULL RANGE

SureFarm® 10 - Hot Roll Asphalt (HRA) Surface Course, Polymer Modified Bitumen (PMB)

APPLICATIONS

- LIVESTOCK AREAS
- SILEAGE AREAS
- STORAGE AND SLURRY BAYS

GUARANTEED COMPLIANCE

All mixtures comply fully with BS EN 13108 'Bituminous Mixtures' and the accompanying guidance notes (PD6691 Appendix B) as applicable.

Product testing complies fully with the requirements of BS EN 12697 'Test Methods for Hot Mix Asphalt'.

Product installation and any subsequent testing is also compliant with BS 5944987 'Asphalt for Roads and Other Paved Areas'.
