

SUREFLIGHT®

SureFlight® is a range of airfield products designed specifically for the civil and military sectors, where the specification demands higher performance

SureFlight® is based around a stone mastic asphalt (SMA) enhanced with carefully selected constituents. It comes in a 10mm aggregate size surface course with a 55-68 polished stone value (PSV). It can be produced with either penetration grade bitumen 40/60 or polymer modified bitumen (PMB)

AVIATION

SUREFLIGHT®

WHY CHOOSE SUREFLIGHT®

- ✔ SureFlight® has been developed to have excellent rut resisting properties and enhanced durability.
- ✔ Using a specially engineered modified binder, a fuel resisting variant is also available, specifically for areas that could potentially be exposed to oil and fuel spillages.

APPLICATION BENEFITS

- SureFlight® offers versatility and durability, with tough and resilient properties, thanks to its specially designed mixture.
- Designed to meet both the Defence Estates and BAA (British Airports Authority) specifications for airside stone mastic asphalt (SMA).

DISCOVER THE FULL RANGE

SureFlight® 10 - Stone Mastic Asphalt (SMA) Surface Course, 55 - 68 Polished Stone Value (PSV)

Available in a PMB and Penetration Graded Bitumen 40/60

APPLICATIONS

- TAXIWAYS
- RUNWAYS
- PERIMETER ROADS

GUARANTEED COMPLIANCE

All mixtures comply fully with BS EN 13108 'Bituminous Mixtures' and the accompanying guidance notes (PD6691 Appendix B) as applicable.

Product testing complies fully with the requirements of BS EN 12697 'Test Methods for Hot Mix Asphalt'.

Product installation and any subsequent testing is also compliant with BS 5944987 'Asphalt for Roads and Other Paved Areas'.
