

## FM Conway Awarded Key Contract Lots with the Royal Borough of Kensington and Chelsea

**Leading infrastructure services company FM Conway has been appointed to Lots 2 & 3 of the Royal Borough of Kensington and Chelsea’s Highways Maintenance Contracts 2025, to deliver key infrastructure works across the borough.**

Lot 2 of the contract focusses on the routine and reactive maintenance of the borough’s structures, encompassing river crossings including the Albert and Chelsea bridges, as well as the Thames River wall. Lot 3 includes the maintenance and delivery of public realm projects, footway paving, carriageway surfacing and road marking, street lighting, and emergency and planned maintenance to the highways infrastructure.

The contract term which began in April 2025, and runs for five years with an optional three-year extension, continues the long-standing relationship between the Royal Borough of Kensington and Chelsea and FM Conway. The most recent contract period saw the delivery of the flagship Sloane Street public realm transformation, delivered in partnership with Cadogan, which demonstrated the high-quality resources and workmanship that FM Conway will be utilising over this new contract period.

With innovation and carbon reduction key themes throughout the tender process, FM Conway’s pioneering work with materials re-cycling, combined with its UKAS accredited laboratory facilities will deliver a sustainable approach to support the borough’s ambitions to achieve net zero carbon emissions by 2030. FM Conway is a PAS2080 certified contractor, its credentials in the management and reduction of carbon emissions independently verified by the British Standards Institute.

**FM Conway Managing Director of Term Maintenance, Matt Smith, said:**

*“The Royal Borough of Kensington and Chelsea combines historic grandeur with modern sophistication, and its infrastructure is an artwork of garden squares, mews, footpaths and carriageways that reflect the unique character of the borough. FM Conway is a long-standing delivery partner of the Royal Borough, and we’re thrilled to continue our partnership to look after the infrastructure assets for the residents and visitors to Kensington and Chelsea. The*

# PRESS RELEASE

August 2025

*close relationships we've built with our counterparts in the borough will allow us to work collaboratively towards our shared goals, and I look forward to continuing to develop this partnership."*

**Cllr Johnny Thalassites, lead member for environment and planning, said:**

*"Our borough is home to some of London's most iconic locations, from historic structures like the Albert Bridge to world-famous destinations such as Sloane Street, South Kensington and Notting Hill.*

*"We take our responsibility as custodians of these assets very seriously and these contracts will ensure that we are able to continuously maintain and upgrade Kensington and Chelsea's amazing spaces for residents and visitors now and in the future."*

**About FM Conway**

FM Conway is a leading infrastructure services company. Operating in transportation, the built environment, and public realm, we self-deliver all of our services, providing in-house capabilities across the entire lifecycle of a project.

We inspect, design, build, enhance and maintain essential infrastructure services for the community.

With over 60 years' experience, we pride ourselves on being an industry leader and innovator, especially in recycling and reuse. We have a network of asphalt and aggregate recycling manufacturing plants serving London and the wider regions throughout the UK, as well as a Thames-side wharf and our own research and development laboratory.

We recycle 98% of highway arisings, including kerbs, paving and concrete and we have the ability to produce asphalt with a high recycled content and a low carbon footprint.

We are a member of the British Safety Council, the Civil Engineering Contractors' Association, and the Quarry Products Association, as well as being BSI registered for environmental and quality management.

We are multi-award winning in our approach to road safety and were the first company in the UK to have achieved British Standard ISO 39001, which provides a framework to help organisations reduce the incidence and adverse effects of road traffic accidents.
