

FM Conway announces new CEO Adam Green, as Michael Conway MBE becomes Chairman.

For Press release 4th September 2020

Leading infrastructure services company FM Conway has today announced the appointment of Adam Green to CEO as Michael Conway MBE steps into the role of Chairman.

Michael Conway MBE has been at the helm of FM Conway since 1981 when he bought the company from his father, Frank Conway. The company started from very humble beginnings as a road mending business with just three men and a lorry. Michael has grown and transformed it over the past 39 years into an organisation that now employs over 1500 people with a turnover of over £325m; and has still managed to keep the family spirit and ethos at the heart of the organisation.

Adam Green joined FM Conway in November 2019 as Managing Director for Civil Engineering, Structures, Lighting, Water and Drainage Management, Traffic Management and Consultancy. With over 30 years' experience in the industry, he has led multi-billion-pound businesses and delivered a diverse range of infrastructure projects.

Michael Conway MBE, Chairman, commented: "My father had a dream in 1961, and by 1981 that dream had been realised so I was passed the baton to take the business to the next stage. Today, it gives me great pleasure to pass that baton on once again; It will now enjoy a fresh pair of eyes and a new set of hands to navigate the business into it's 60th year and beyond.

I've known Adam for a long time, and when I brought him into the business it was a chance for us both to understand whether this was a good fit. I am pleased to say that It didn't take long to realise it was right, and so now is the time for Adam to take on the day-to-day operational lead as I assume the role of Chairman. I look forward to seeing our great business continue to go from strength to strength under Adam's leadership as we all adjust to the post COVID-19 era."

Adam Green, CEO, commented: "I am both delighted and honoured to take on the prestigious role of CEO of FM Conway. I have long admired the business and am keen to ensure that the strong family values and people remain at the heart of what we do.

Our unique self-delivery model truly stands us apart from our competitors and I am excited to explore this even further as we look at new technologies to bring greater levels of service to our customers."

PRESS RELEASE

September 2020

About FM Conway

FM Conway is a leading infrastructure services company delivering vital services in transportation, the built environment and open spaces for communities and businesses.

We inspect, design, build, enhance and maintain essential infrastructure services for the community. We are of London's leading highways contractors, providing highways services for around half of the capital's boroughs, demonstrating the strength of our term maintenance offer which is underpinned by our unique approach to self-delivery.

With more than 58 years' experience, we pride ourselves on being an industry leader and innovator, especially in recycling and reuse. We have a network of asphalt and aggregate recycling manufacturing plants serving London and the south of England, as well as a Thames side wharf and our own research and development laboratory. We have the ability to produce asphalt with a high recycled content and low carbon footprint.

We are a member of the British Safety Council, the Civil Engineering Contractors' Association, the Chartered Institute of Highways Transportation and the Quarry Products Association, as well as being BSI registered for environmental, quality, occupational health and safety, and road traffic safety management.
