

AGGREGATES AND ASPHALT DIVISION

SUREFLIGHT

A range of pavement solutions for
air side applications

SUREFLIGHT

SureFlight is a range of air side products designed specifically for the civil and military sectors – where the specification demands higher performance.

SureFlight is based around Stone Mastic Asphalt (SMA) with enhanced constituents.

Features and benefits

SureFlight has been developed to have excellent rut resisting properties and enhanced durability.

Using a specially engineered modified binder, a fuel resisting variant is also available, specifically for areas that could potentially be exposed to oil and fuel spillages.

Versatility and durability

SureFlight has tough and durable properties due to the specially designed mixture properties.

Designed to meet both the Defence Estates and BAA specifications for air side SMA.

Applications

Taxiways
Runways
Perimeter roads

Guaranteed compliance

All mixtures comply fully with BS EN 13108 'Bituminous Mixtures' and the accompanying guidance notes (PD6691 Appendix B) as applicable.

Product testing complies fully with the requirements of BS EN 12697 'Test Methods for Hot Mix Asphalt'.

Product installation and any subsequent testing is also compliant with BS 5944987 'Asphalt for Roads and Other Paved Areas'.

Certified performance

For detailed guidance on material selection, laying requirements and appropriate uses, contact our Aggregates and Asphalt division.
