

AGGREGATES AND ASPHALT DIVISION

THE SUREPOL RANGE

A range of polymer modified
bitumen solutions

THE SUREPOL RANGE

The SurePol Range of polymer engineered bitumen solutions are designed to help address changes in climate and increased traffic patterns.

SurePol TS

SurePol TS is a polymer modified binder formulated to reduce bitumen drainage, has high elastic recovery and increased aggregate adhesion. This polymer modified bitumen is commonly used in thin surface course and Stone Mastic Asphalt materials.

SurePol XT

SurePol XT is a specifically designed binder for use in Hot Rolled Asphalt materials where there is an increased need for resistance to deformation.

SurePol RC

SurePol RC is a polymer engineered solution developed to enable the use of high percentage recycled asphalt within the mixture.

SurePol HD

SurePol HD is designed to give improved resistance to deformation as well as increased toughness and flexibility for use in high stress applications.

Features and benefits

- Improved resistance to rutting and cracking.
- Greater elasticity.
- Improved durability.
- Reduced temperature susceptibility.
- Improved cohesion and adhesion.
- Increased fatigue resistance.
- Improved fuel resistance.

Certified performance

As with all binders - optimum performance can only be achieved through the appropriate mix design and testing procedures.

Guaranteed compliance

Compliant with BS EN 14023, 3rd Party accredited to ISO9001 and CE approved.

For detailed guidance on material selection, laying requirements and appropriate uses, contact our Aggregates and Asphalt division.
