

# URBANPHALT®

A durable asphalt product for urban  
and rural areas

# URBANPHALT®

*UrbanPhalt* is a fatigue and crack resistant polymer modified asphalt product suitable for urban and rural areas.

## Endurance and versatility

*UrbanPhalt* is a dense asphaltic concrete using a specifically designed Polymer Modified Bitumen (PMB).

Designed and manufactured with proven resistance fatigue, *UrbanPhalt* has low void content offering high durability whilst retaining its high skid resistance. Its impermeability qualities protects the structural integrity and resists the potential for frost damage.

*UrbanPhalt* is ideal for use in low speed, low to medium traffic applications e.g. concrete estate roads or those with poor, weak construction which requires overlaying with a crack resisting surface course.

## Features and Benefits

- Superior resistance to fracture and cracking.
- High retained skid resistance.
- Superior deformation resistance when compared to other surface course systems.
- Suitable for concrete overlay, reducing road closure times.
- Fully sustainable.

## Certified performance

All mixtures comply fully with BS EN 13108 'Bituminous Mixtures' and the accompanying guidance notes (PD6691 Appendix B) as applicable.

Product testing complies fully with the requirements of BS EN 12697 'Test Methods for Hot Mix Asphalt'.

Product installation and any subsequent testing is also compliant with BS 5944987 'Asphalt for Roads and Other Paved Areas'.

For detailed guidance on material selection, laying requirements and appropriate uses, contact our Aggregates and Asphalt division.
