

UTILIPHALT

A dense surface course with low air voids to create a more durable pavement

UTILIPHALT

Utiliphalt is a uniquely designed dense material ideally suited for footway and utility reinstatement.

Utiliphalt is formulated to give significantly lower air void contents than conventional asphalt surfacings without compromising stability or stiffness.

Endurance and versatility

Designed and manufactured to increase durability and reduce whole life cost.

Available in a range of PSV (Polished Stone Value) aggregates to enhance skid resistance.

Features and benefits

- Reduced network disruption.
- Produced in small or large quantities for added value and cost effective surfacing.
- 100% recyclable.
- Can be used a dual layer system.

Certified performance

Manufactured to meet the requirements of the SROH - Specification for Reinstatement of Openings in the Highway.

For detailed guidance on material selection, laying requirements and appropriate uses, contact our Aggregates and Asphalt division.
